PROJECTS

- **Social Media Frontend Application** Mar 2024 – April 2024
 - Developed a social media web application using pure HTML, CSS, and JavaScript, enabling users to create profiles, post content, like, and comment.
 - Implemented interactive features like user posts, comments, and likes entirely on the client-side using vanilla JavaScript and DOM manipulation.
 - Managed user data and sessions locally using localStorage and sessionStorage to simulate dynamic interactions.
 - Designed a modern, responsive user interface with CSS3, Flexbox, and Grid, ensuring seamless performance across different devices and screen sizes.
 - Prioritized browser compatibility and optimized page load times by writing clean and efficient code.
- **Chat Application:** Mar 2024 – April 2024
 - Developed a real-time messaging system for instant communication between users, enhancing engagement and user interaction.
 - Implemented WebSocket technology for maintaining persistent connections, achieving low-latency communication and a smooth user experience.
 - Created a user authentication and authorization component, ensuring secure access and protecting user data from unauthorized access.
 - Applied logging and monitoring tools to analyze system performance and user activity, enabling prompt issue resolution and optimization of the application.
